Alerting Abstract US A1

NOVELTY - The metadata describing statistical parameters, ontological parameters, measurement units, characteristics such as data type, name, length of each column of database table, are generated. The generated metadata is subsequently associated with the appropriate columns of the database table.

DESCRIPTION - INDEPENDENT CLAIMS are also included for the following:

- 1.query execution management method;
- 2.recorded medium storing data storage management program;
- 3.recorded medium storing query execution management program; and
- 4.data processing system.

USE - For performing computer-based management of data stored in database tables such as relational database table, tabular database table, distributed database table, in pharmaceutical company.

ADVANTAGE - Enables identification of correlated columns in database tables efficiently using the stored metadata, thereby allowing the user to

merge the correlated columns easily.

DESCRIPTION OF DRAWINGS - The figure shows a schematic diagram of the data storage management system.
114,124 database tables

PLUS Search Results for S/N 10829613 Searched Mar 12, 2007.

The Patent Linguistic Utility System (PLUS) is a USPTO automated search system for U.S. Patents from 1971 to present. PLUS is a query-by-example search system which produces a list of patents that are most closely related linguistically to the application searched. This search was prepared by the staff of the Scientific and Technical Information Center, SIRA.
